Amanuel Ayezabu

Full Stack Developer
Helsinki Metropolitan Area

Summary

As a Full Stack Developer Trainee at Integrify, I worked with a team of talented and diverse developers to create web applications using various technologies, such as typescript, React.js, and SQL. I enjoy problem-solving and learning new skills every day, as well as applying the best practices of web development, such as accessibility, responsiveness, and security.

I also have experience as a Scrum Master at WeDance, a social media platform that connects dancers worldwide. I facilitate agile processes, such as sprint planning, daily stand-ups, and retrospectives, and ensure that the team delivers high-quality and user-centric features. I am passionate about creating software products that are visually appealing, engaging, and user-friendly, and that reflect the needs and preferences of the target audience. I have a Bachelor of Engineering degree in Information Technology from Metropolia University of Applied Sciences, where I learned the fundamentals of programming, software engineering, and web development. My goal is to further expand my knowledge and skills in the web domain and to contribute to meaningful and impactful projects.
